Office Environment

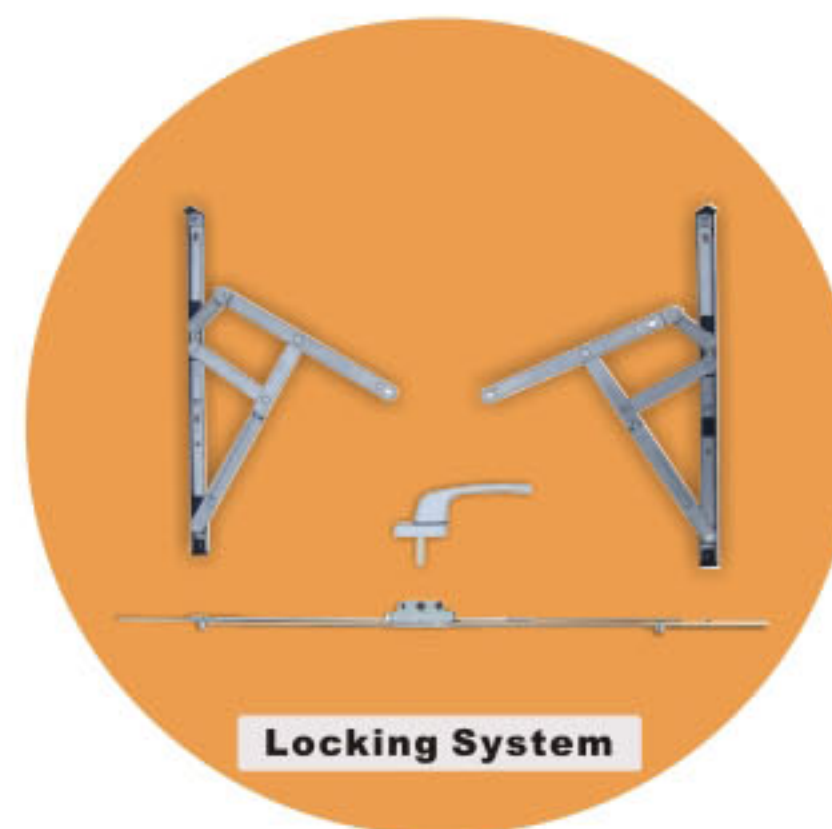

Casement Windows

- Casement windows are windows having a hinged sash which swings in and out just like a door.
- The window could have a top-hung, side-hung, bottom-hung sash or it could have a mixture of all the three sashes.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are 304 Stainless Steel for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied, air can be directed into your home without insects.

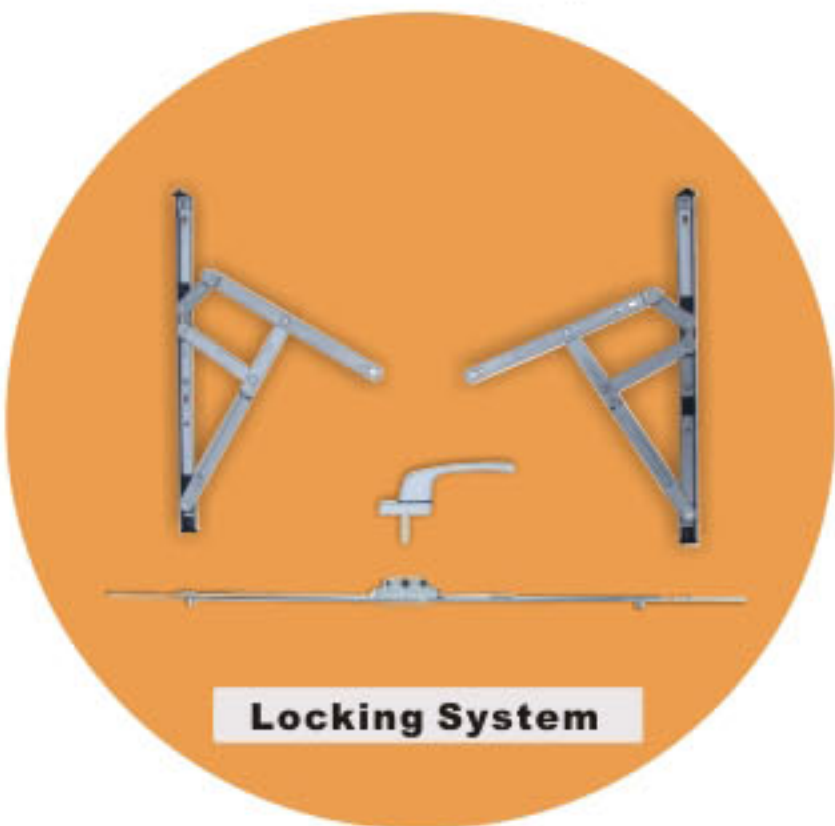

Awning Windows

- Awning windows top hung opening allowing fresh air to ventilate more easily. At the same time the house stale air escapes through the larger opening at the top.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties

Locking System

- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are 304 Stainless Steel for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied, air can be directed into your home without insects.

Sliding Windows

- Sliding Windows have long been a popular choice by homeowner and builders because of their excellent functionality and value for money. Because of its easy install and operate features, sliding window plays an important role for a perfect balcony or any space division

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Multi-point stainless steel locking device for enhanced security Heavy duty wheels for maximum durability
- Fusion welded frame and sash corners for strength and durability Easy to add insect screen, security screen or fiber mesh.

Heavy Duty Wheels

Tilt & Turn Windows

● A tilt and turn window operates by a single lever which controls both the tilt and the turn. Typically a quarter turn of the lever will allow the window to swing inwards like casement window. A second quarter turn will allow the window to tilt inwards from the top.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are baked powder coated for max durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Easy to add both insect screen to outside, security screen or fiber glass mesh.

Bifold Windows

● Bifold windows are a popular and versatile window for many applications. With a wide opening to maximise views and airflow, bi-fold windows play a wonderful role in opening the inside to the outside. Our range of stylish bi-fold windows deliver an expansive feeling to the home.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are baked powder coated for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied.

Handcrank Windows

- Handcrank windows can increase the flow of air and provide a good deal of natural light. They can be used for larger openings, and are very popular for window openings that can be hard to reach. They're easy to use and are very energy efficient.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are stainless steel for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Easy to add both insect screen to inside, security screen or fiber glass mesh.

Single Hung Windows

- Single hung windows feature a stationary upper sash with a lower sash that slides up and down.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Easy to add both insect screen to outside, security screen or fiber glass mesh.

Bay & Bow Windows

- A bay & bow windows consists of three windows – it is essentially a large picture window that is flanked on either side by smaller windows set in at any degree angles. They are ideal for enhancing your view, and the perfect location for a window seat. They can be small and cozy or large and inspiring – it is entirely up to you.
- Improved Light: Because bay windows project from exterior walls, they bring in light from multiple directions, and that makes them great places to read a book or just relax and soak up the sun.
- Higher Resale Value: Bay windows can add a lot to your home's curb appeal, thereby increasing its market value.
- Better Air Flow: Using casement or double hung windows in the angled areas can capture breezes and enhance the comfort level of any room.

Combination Windows

- Stronger reinforcement offers higher wind-load resistance, the special drainage system design, keeps breeze from blow to result in rainwater and dusts enter.
- Combination fabrication provide with a more elegant and special window, and will show you a well vision from indoor and outdoor.

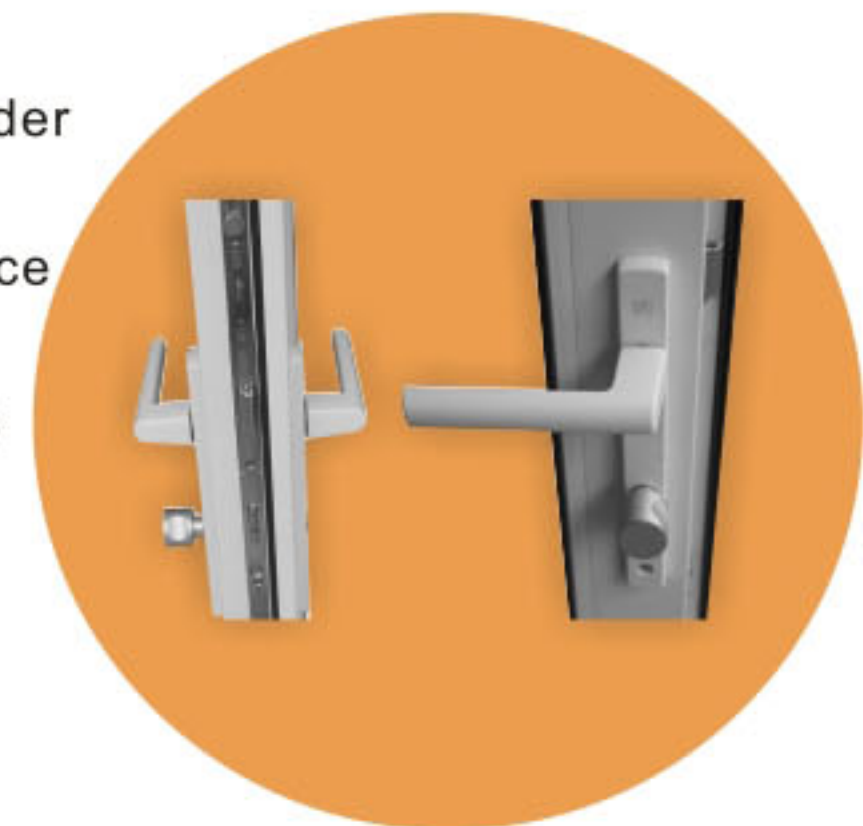

Hinge Doors

- Perfect for both classic and contemporary homes, hinge door is great choice for any desired aesthetic.
- The hinge doors is also called casement doors, French doors

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are baked powder coated for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied.

Sliding Doors

- A Sliding Patio Door manufactured from ROPO company has classic good looks with a maximum glass area which optimise visibility, making it a perfect choice for conservatories, balconies, porches or extensions.
- ROPO Patio Door systems are available in a wide range of options with a choice of two, three or four panels.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Multi-point stainless steel locking device for enhanced security Heavy duty wheels for maximum durability
- Fusion welded frame and sash corners for strength and durability
- Easy to add insect screen, security screen or fiber mesh.

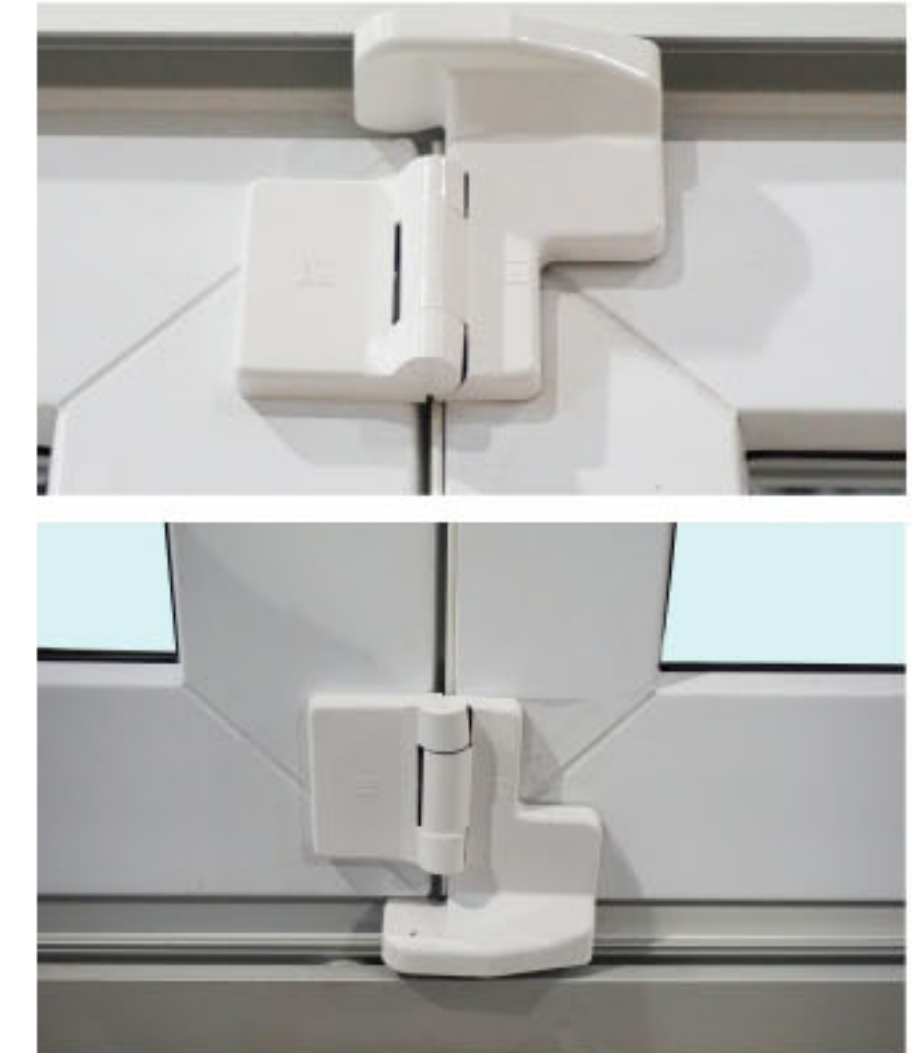

Heavy Duty Wheels

Folding Doors

- Folding Doors Concertina doors (Folding Sliding Doors) are all more commonly known, provide you far wider widths than conventional the other kind doors and also provide 90% clear opening as opposed to patio doors 40%.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges and Wheels is for maximum durability
- Multi-point stainless steel locking Fusion welded frame and sash corners device for enhanced security
- for strength and durability
- Retractable Screen can be applied.

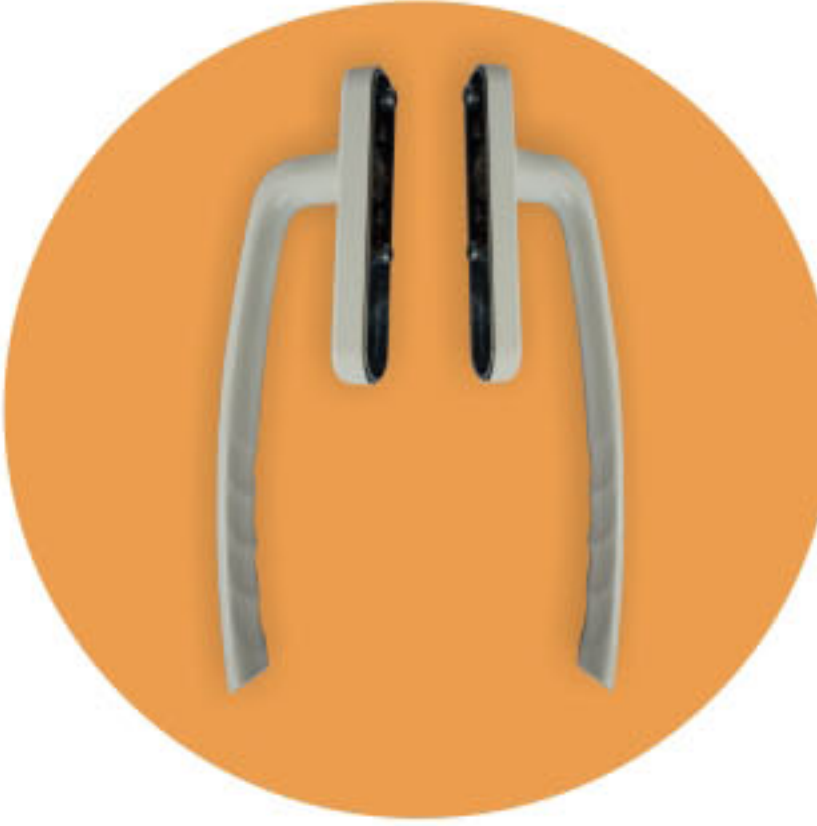

Lift & Sliding Doors

Heavy Duty Wheels

- Lift-Slide doors offer great openings – with 20 feet maximum width made from just two large glass panels, Lift-Slide doors are a quintessential tool for modern living. No other type of patio door can offer expanses of glass this big without dividers limiting your view.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty Wheels is for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied.

Tilt & Sliding Doors

- The tilt and sliding doors are very similar to sliding doors, the only difference being that the door sash can be tilted inwards from the top, in this great range of tilt and slide!

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty Wheels is for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied.

Tilt & Turn Doors

- Tilt and Turn style doors offer elegant designs to suit your home with a range of flexible opening options making your door attractive and easy to clean. And also offer you fresh and safe ventilation.
- The tilt and turn doors are inward opening doors with single handle dual function. Tilt is meant for secure ventilation with the bottom hung towards inward position and Turn is meant for cleaning with possible restricted access with side hung in an inward direction. These doors are large in size and some doors are available with either tilt only or with turn only facility. These types of doors are good in case of fire emergencies, offers great security against break-ins.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Heavy duty hinges that are baked powder coated for maximum durability
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied.

Corner Doors

- Corner Doors is also be called corner butt-joint doors. This is a kind of door that provide you a distinguished looking from exterior, commonly be used in private villa.

Features

- Multi-chambered frame and sash extrusions for superior strength and insulating properties
- Frame and sash reinforced for easy fastening of hardware and increased rigidity
- Multi-point stainless steel locking device for enhanced security
- Fusion welded frame and sash corners for strength and durability
- Retractable Screen can be applied
- Excellent vision experience

Integral Blinds

Sunshade System

- Integral blinds can be fully opened, closed, or tilted in the same way as conventional blinds, in order to allow as much or as little light as you want and to protect your privacy. The

advantage over conventional blinds is that the blinds are actually incorporated into the glass of the window or door. They're inside a doubleglazed, argon gas filled unit, which means they'll never attract dust and never need cleaning.

PVC Louvers

- The louver sheet angle can be controlled manually.

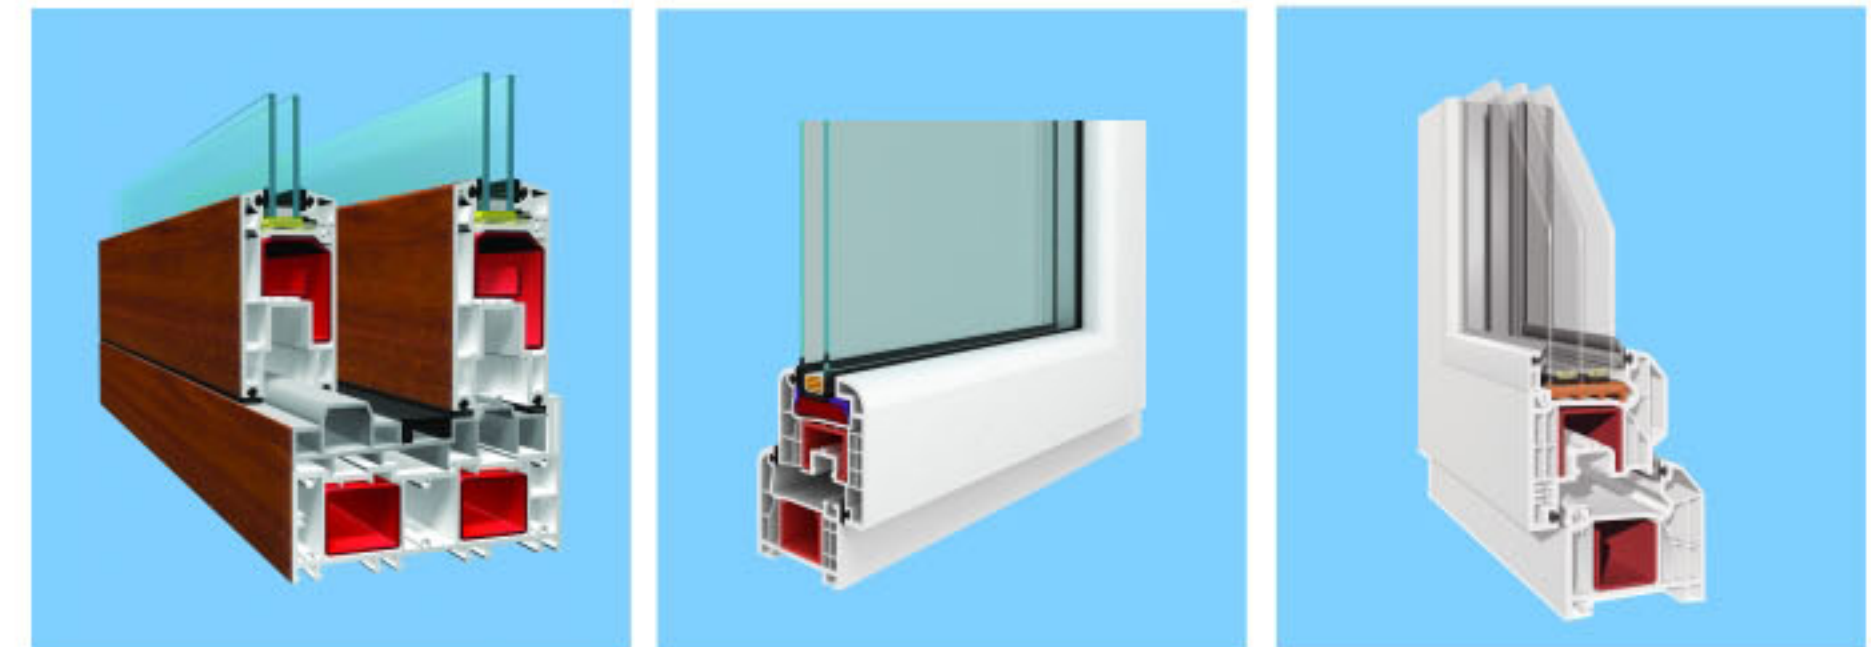

- The doors are designed with individual style, beautiful appearance and elegant pattern. Surface treating is powder coating, could waterproofing, anti-sunlight, anti-rust, anti-lacerated. With rigid structure, theft proofing, noise proofing, warm keeping,
- **Advanced opening ways:** Manual, Switch and Remote Controlled with Auto-lock Function.

Roller Down Shutters

UPVC Profile

- UPVC Windows allow you to put away your paintbrush and enjoy long-lasting performance and lower energy bills. The special design of the 3-chamber or multi-chamber improves the heat-insulating and sound-insulating performance of the material. The reasonable design of the drainages' structure guarantees the avoidance of mutual infiltration. The broad steel lined inner chamber and the usage of a special steel liner (thickness: 1.5 mm) corresponding to the shape of the inner chambers improves the stability of the windows. UPVC Windows have many different benefits and advantages over other window materials.
- The UPVC frame is from German Veka, German Rehau and Chinese top Trademark-Zhongcai.

Different Colors are Available

1. White
2. Co-extrusion Profile, The Co-extrusion materials is from ASA.
3. Laminated Profile, The foil is from German Renolit.

Glass

Clear Glass

- Pure and transparent appearance gives you a comfortable feeling

Toughened Glass

- Hot up glass, then refrigerate it immediately. High strength. When broken, it comes into many small and fillet granules. It is safety glass

Laminated Glass

- There is a film between two pieces of glass. High sound insulating performance.

Reflective Glass

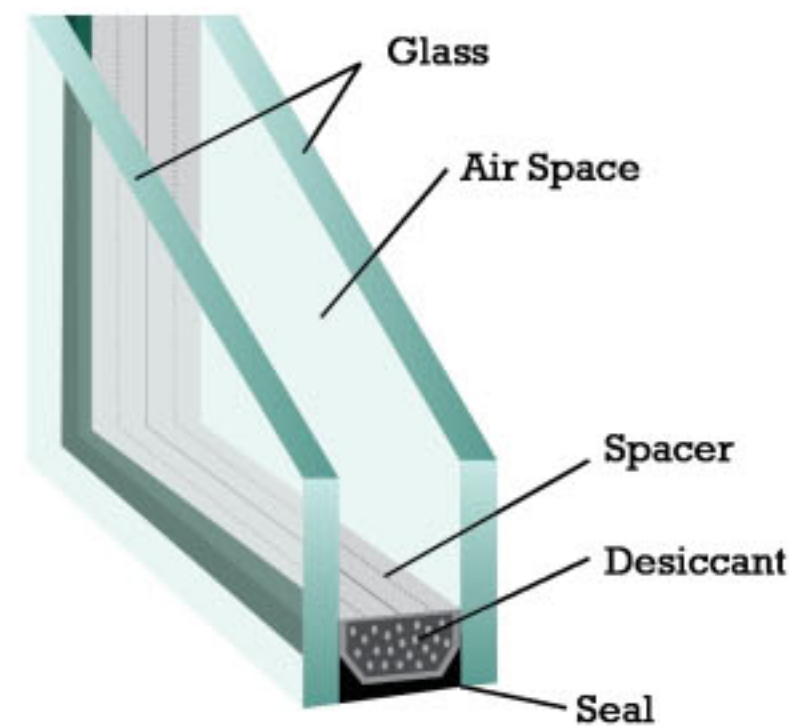

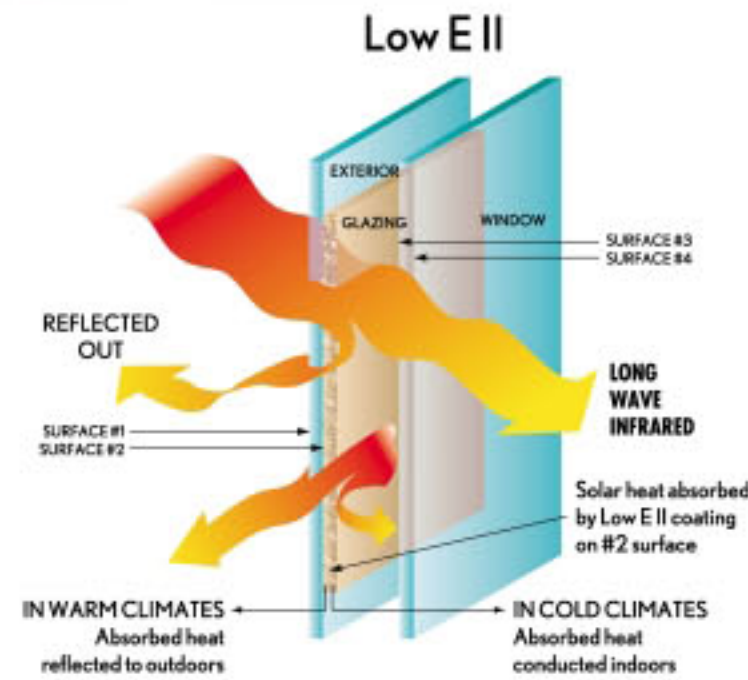

- Coated with a film of metal or oxide to deflect most of sun shine. Good shading and heat insulating property.

Low Emittance Glass/ Low E Glass

- Transmit visible light, deflect infrared radiation. Different from if made into insulating glass, the U value is very low.

Insulating Glass

- Consist of two or more pieces of glass, aluminum spacer / warm edge spacer with dryer and sealant around perimeter.

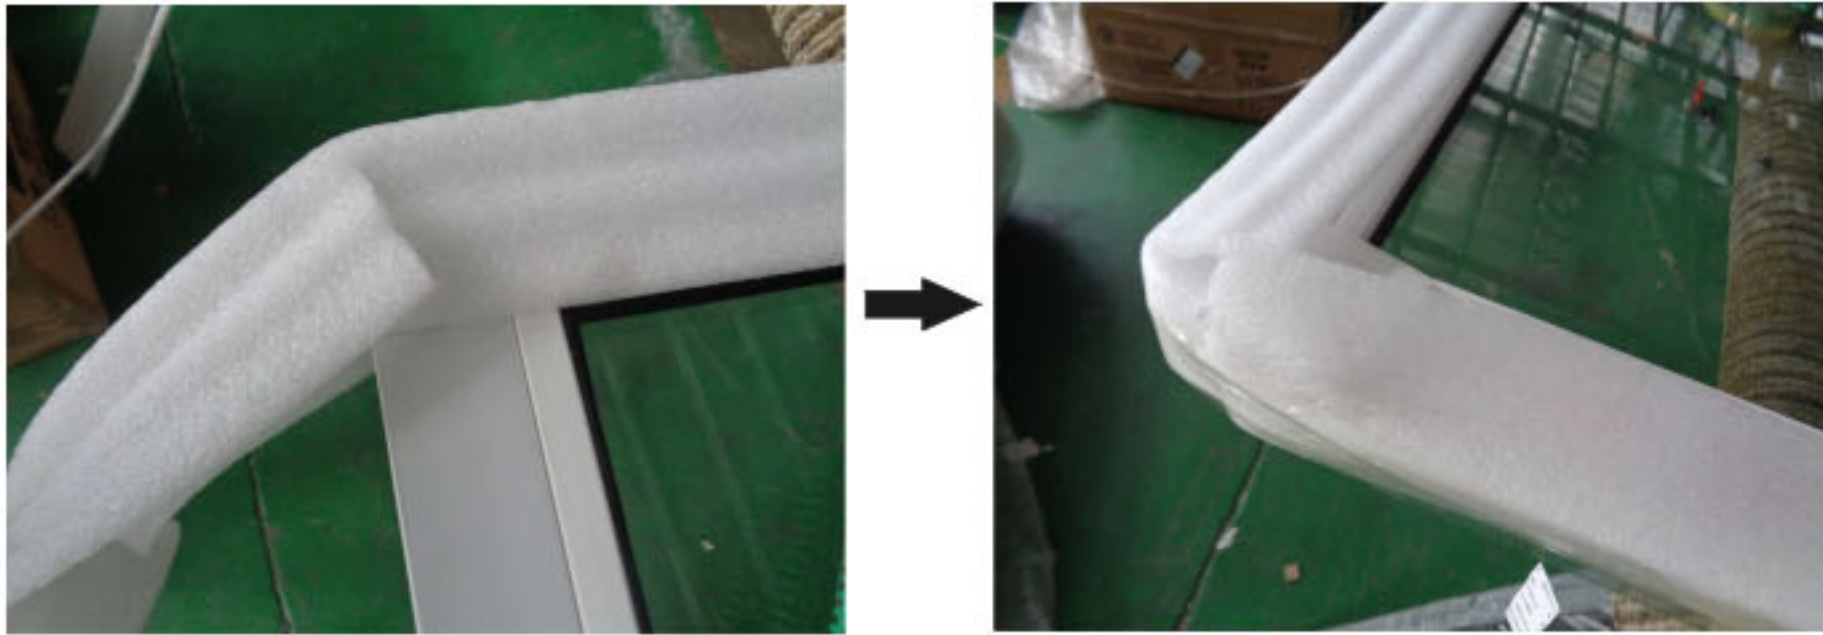

Locking System

- The hardware produced by European professional manufacturers allows these doors and windows to move easily:

Features

- Attractive and Stream-lined: the mechanical coupled devices are hidden in the doors and windows.
- Simple to operate: the design of different opening method.
- Safety: the multi-lock design around the doors and windows improves their burglary resistant performance.
- The main trademark is Roto, Siegenia Aubi, Dr-Hahn, Hautau.

Packing

- The first layer is expandable Polyethylene for the frame in order to avoid the frame impact floor.
- The second layer is bubble to protect the glass, avoid the water and other liquid permeation during transfer.
- The third layer is carton
- The last is with steel pallet.

Loading Container

- Every window with a sticker, shows the window code as per design drawing.
- For fast storing, store and installation.

Testimonials

● I really appreciate our relationship and your products are great I am finally building my house and putting up the windows that I bought 4 years ago They are absolutely beautiful will send u pics so u can use in your brochures when the house is finished Sent from my iPhone

---Dion

● Bad photo but that's your window being lifted in place with a 20 ton excavator. We brought in a specialist window person from 1,000 miles away to put the windows in and he was very impressed with the quality of the windows . He said that the offset weep/drainage holes are better than they use in Australia and the dimensions were also very accurate so ..Thank you so much for such a good job and I have enjoyed working with you. Yes I will get everyone I know to buy from you.

---Michael

● Sorry for the long delay in replying to your e-mail. The work on the house has finally gone forward in leaps and bounds with the roof being completed and the plasterers almost finished. I will endeavour to send a photo or two with this e-mail showing your product installed into the house. My wife and I are very happy with the windows and doors , they really highlight the appearance of the house and have drawn a lot of interest from passing car and pedestrians. Kind regards

---Myk

● Hi Benson,
We are almost finished installing the windows from the last shipment and I am happy to report that all of the windows so far fix perfectly including the arches. Thanks so much for the level of efficiency and quality I received from you thus far. I will contact you soon!

Lawrence Taylor

Compliance certificate

● Provides a 10 year guarantee against faulty workmanship and materials from date of manufacturer and refer to the following items

- Frame
- Lock System
- Fabrication

● The manufacturer certifies that the windows and doors supplied to
